

M CHIDANAND

Software Developer – Angular & Java Full Stack

Chennai, Tamil Nadu | 7989099908 | maasandramchidanand@gmail.com | linkedin.com/in/m-chidanand | github.com/Chida1602

PROFESSIONAL SUMMARY

Full Stack Software Developer with **2.8+ years of experience** in Angular (12+), Java Spring Boot, and Quarkus microservices. Delivered 20+ Agile sprints on schedule, raised E2E test coverage to 90% with Cypress, and improved page load speed by 20%. Proficient in REST API development, RxJS, NgRx state management, and Dependency Injection. Experienced with Linux, Docker, and CI/CD pipelines. Published IEEE researcher with proven cross-functional teamwork across UX, QA, and product stakeholders.

TECHNICAL SKILLS

Frontend: Angular 12+, TypeScript, JavaScript ES6+, HTML5, CSS3, RxJS, NgRx, State Management, Dependency Injection, Angular Material, Bootstrap

Backend: Java 8, Spring Boot, Quarkus, REST API Development, Microservices Architecture, Node.js

Databases: MySQL, PostgreSQL, Oracle, SQL, SQL Query Optimization

Testing: Cypress E2E, Unit Testing, Test Automation, Integration Testing

Tools and DevOps: Linux, Docker, Git, GitHub, CI/CD Pipelines, Angular CLI, VS Code, IntelliJ IDEA, Jira, Confluence

Methodologies: Agile, Scrum, Kanban, SDLC, Code Review, Technical Documentation

PROFESSIONAL EXPERIENCE

Associate Software Engineer

August 2023 – Present

Dedalus Healthcare, Chennai

- Engineered 10+ Angular 12+ feature modules using TypeScript, RxJS, NgRx state management, and Angular Material, improving page load speed by 20% across 3+ product lines.
- Integrated 25+ REST API endpoints with Java Spring Boot microservices, enabling scalable enterprise workflows for 500+ users across healthcare platforms.
- Structured 50+ Angular components using Dependency Injection and SOLID principles, cutting code duplication by 30% and speeding up feature delivery by 40%.
- Established Cypress E2E and unit test suites, raising test coverage to 90% and lowering post-release defects by 25%.
- Partnered with UX designers, product managers, and QA engineers in Scrum and Kanban workflows to review, plan, and release 20+ sprints without delays.
- Converted business requirements into technical specifications with stakeholders, shipping 8+ high-impact features within agreed timelines.

Software Engineer Intern

March 2023 – July 2023

Dedalus Healthcare, Chennai

- Led frontend delivery of a diet planning web application using Angular and TypeScript, applying reusable component architecture that cut development effort by 35%.
- Executed EPMA Silverlight-to-Angular migration across 5+ screens, leveraging SQL query optimization to slash legacy UI rendering time by 15%.
- Coordinated with senior engineers and QA members inside Agile Scrum; met 3 sprint commitments on time and joined standups, reviews, and retrospectives.

Student Intern

January 2022 – May 2022

HCL Technologies, Chennai

- Trained and validated a Heart Disease Prediction System using Logistic Regression, achieving 87% accuracy on a 1,000+ record dataset via scikit-learn cross-validation and feature engineering.
- Trimmed model false-positive rate by 12% through systematic hyperparameter tuning and preprocessing pipeline refinement, boosting prediction reliability.

PROJECTS

FitPro Inc – Diet Planner Web Application

Tools: Angular 12, TypeScript, RxJS, NgRx, REST API, HTML5, CSS3

- Architected a responsive single-page application with NgRx state management and REST API integration, supporting meal tracking, caloric monitoring, and personalized diet planning for 100+ user profiles.
- Introduced lazy loading and modular component design, achieving a 40% improvement in initial page rendering time and overall application performance.

PUBLICATIONS

CNN and Facial Features based Smart Driver Alertness Detection

IEEE – May 2023 – 2023 7th International Conference on Trends in Electronics and Informatics (ICOEI) – ieeexplore.ieee.org/document/10125701

- Proposed a real-time drowsiness detection system using CNN and facial landmark analysis (eye aspect ratio, mouth aspect ratio, head pose estimation), attaining high accuracy via multi-modal feature fusion.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering

2019 – 2023

Sathyabama Institute of Science and Technology, Chennai
